

# Yes, You Really **DO** Need to Replace Your Air Filters!

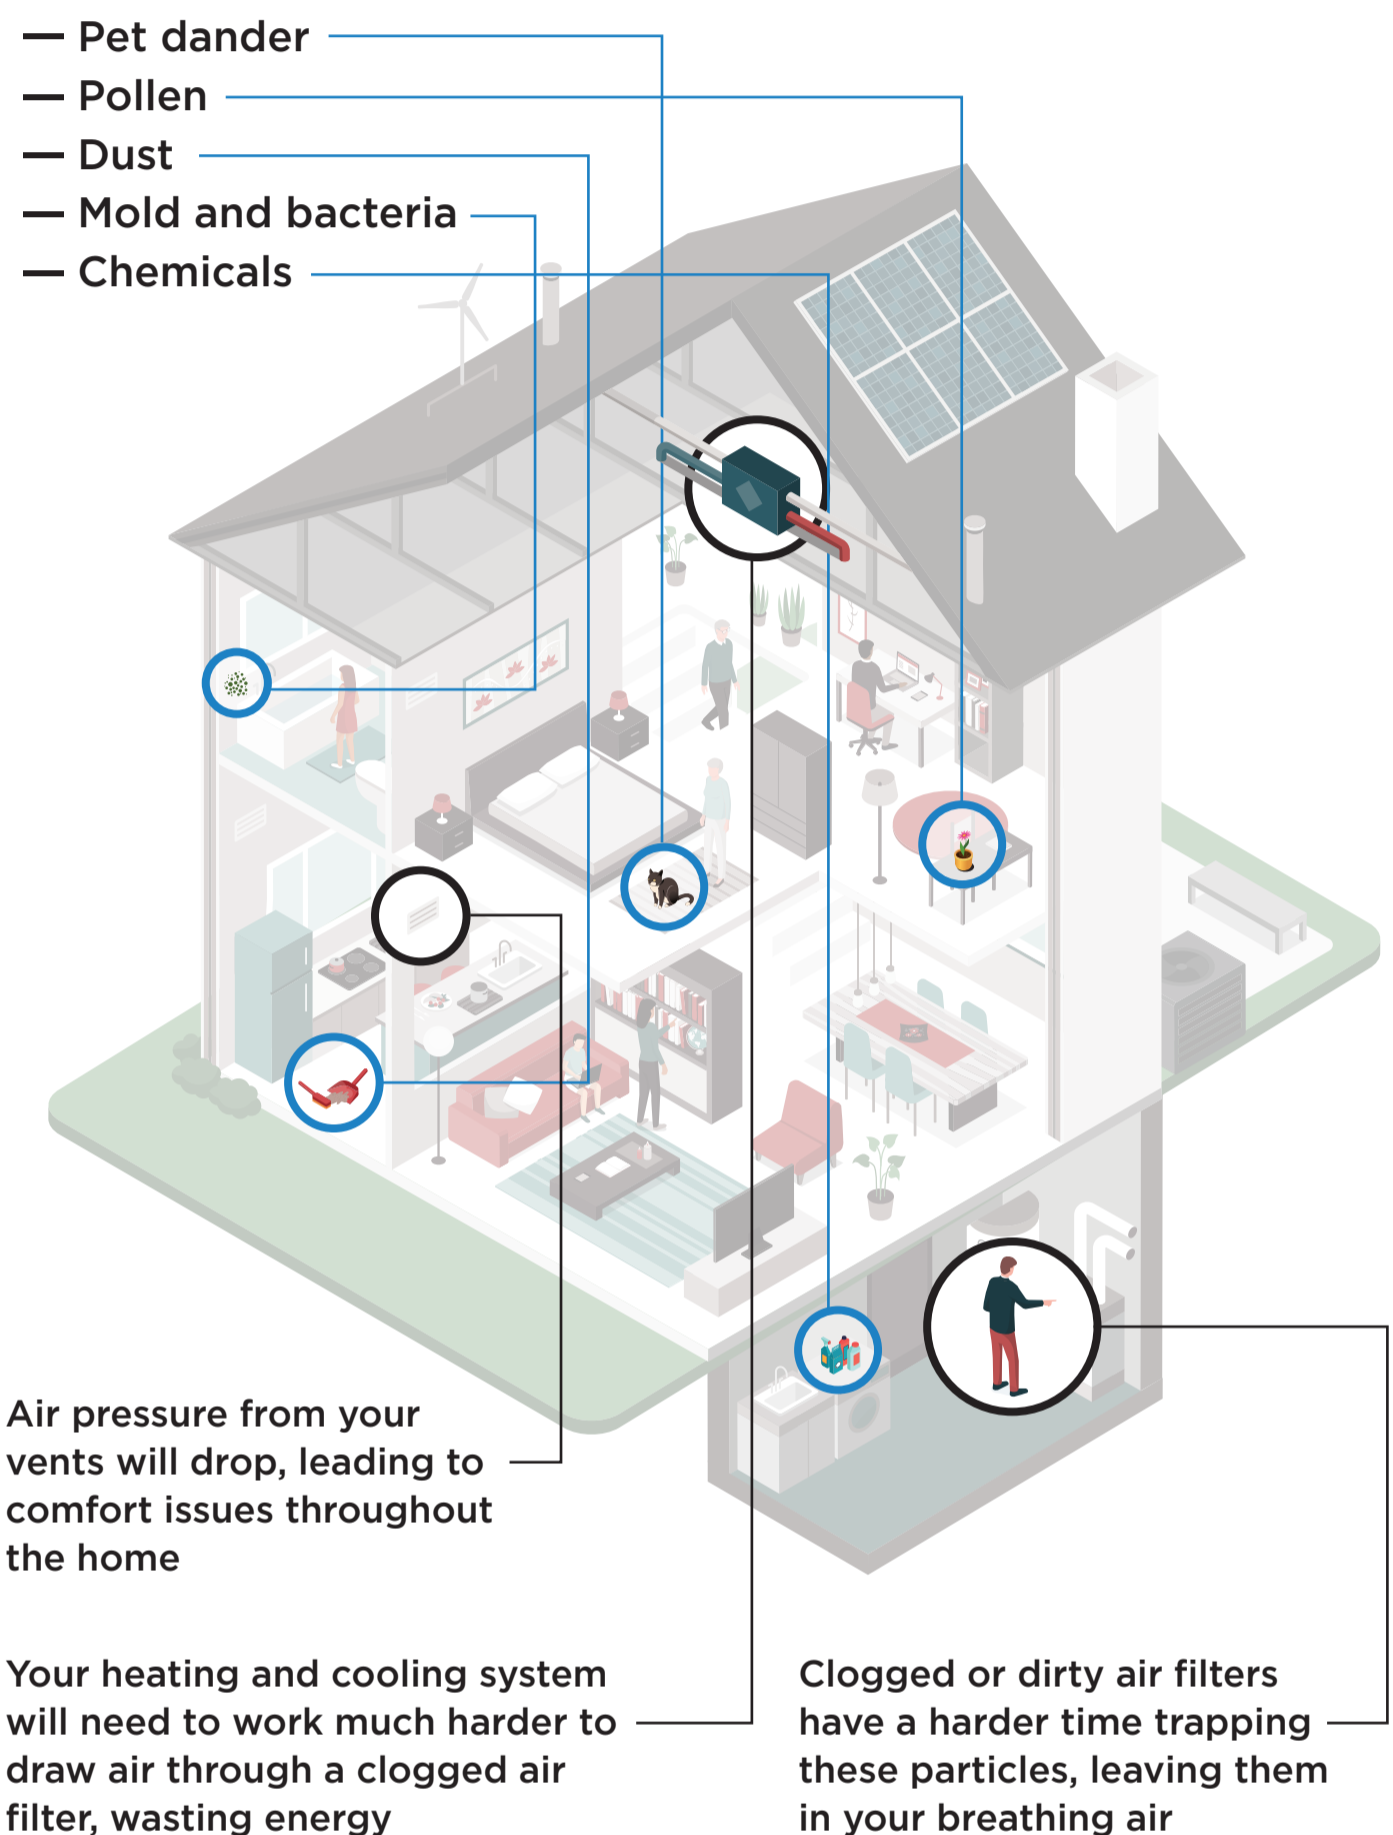

We get it - there are already enough chores to take care of around the house. So when you're wondering how often to change your air filter, it's understandable you'd want to know: Is it really necessary every 30-60 days?

**Absolutely.**

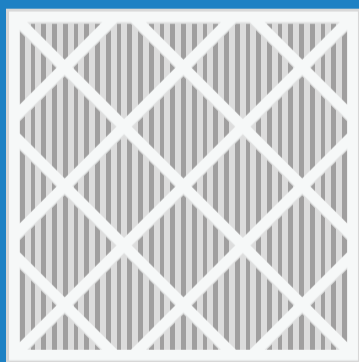

Regularly changing dirty air filters in your home can affect your health, your comfort, and your wallet.

## Your home is a trap for indoor air pollutants like:

- Pet dander
- Pollen
- Dust
- Mold and bacteria
- Chemicals

## Feel the Difference

Replacing your dirty air filters with clean filters requires relatively little effort compared to other HVAC maintenance tasks, but will provide the following benefits all year round:

- Improved indoor air quality
- More consistent home comfort
- Less dust on the surfaces of your home
- Improved HVAC efficiency and energy savings

## Keep Your Air Clean and Healthy with Calfo HVAC Maintenance

Leave your filter replacement to Calfo! With our same-day service guarantee and upfront pricing, you can count on Calfo to keep your air clean and your heating and cooling system running in tip-top shape when you schedule HVAC maintenance.
